

Dear Viewers,

It all began with the garbage strike in 2002 when I was stunned to see the amount of trash my community created. Through that shocking discovery, I found the inspiration to scrape together my savings and make *Garbage!* the film you are about to see.

One of the reasons I made *Garbage! The Revolution Starts at Home* is so you don't have to personally suffer through the stinky experience of a garbage strike or keeping your trash like the Mcdonalds in the movie. By watching *Garbage!* I hope you will start to think about the pollution you create and try and revolutionize the way you live. Why? Because you have the power to change the world. As you are about to see, every little change you make at home has a profound impact on both your personal health and the environment.

Please join us after the screening at [www.garbagerevolution.com](http://www.garbagerevolution.com) and share your thoughts on how you are going revolutionize your community. We have an extensive online family and we sincerely hope you will also be inspired to join us on facebook (take action films) and follow me on twitter (andrewnisker) for daily updates.

If you liked *Garbage!* don't forget to check out our latest film "*Chemical: Redefining Clean For A New Generation*" where one family rids their life of toxins and makes their own cleaners and personal care products. For more information please visit [www.chemicalnation.com](http://www.chemicalnation.com).

From all of us at *Garbage!*, thanks for watching and enjoy the show.

We look forward to hearing from you soon.

To your greener future,

Andrew Nisker
